## OBJECTIVE

I want to become part of a dynamic development team where I can use my skills to their utmost potential.

I believe in continuous learning through experience. That's exactly what I aim to do to serve your organisation as best as possible.

With my dedication, efficiency, and experience as a leader, I want to make a mark as a Full Stack Developer.

## SKILLS

- Java
- React Js
- HTML CSS
- Agile Methodologies
- Git

## PROJECTS

### React js Portfolio Website

While developing this impressive portfolio website, I got to know the power of React components and mastered CSS Modules for streamlined styling, and breathed life into the site with captivating CSS animations.

Tech Stack - React Js, Figma, CSS

### HCL Tech: Deutsche Bank Project

As a Consultant, I am working with development team to improve their product and services.

Tech Stack - Java, Git, Agile Methodologies

### HCL Tech: Northern Western Mutual Project

As a junior developer, I collaborated with the onsite development team to create microservices. These displayed real-time Risk Engineer data and facilitated report generation.

Tech Stack - React JS, Node JS, Agile methodologies, Git

### **HCL Tech Training: Hotel Booking Project**

Designed four Spring Boot database tables for CRUD operations, using SOAP UI & Swagger.

Developed four standalone microservices with Feign Clients and consolidated them into one service displayed on the Eureka Server.

Tech Stack - Java, Spring REST, Restful API, Eureka Server, SQL, Git & Swagger API

### **Veer Kunwar Singh University: Official Website**

- Developed & maintained the official site
- Maintained mail & VPS server
- Updated & Analysed result data
- Updated features on the website
- Led a team of 12 people responsible for creating & managing exam databases, publishing results, and admissions

Tech Stack - HTML, CSS, WordPress, PHP, Excel, VPS & Mail Servers

### **Ibrat Innovations: Website Projects**

Worked on many websites including

- Cosmetofood.in
- Aryanveda.in
- Nimson.in
- Stushi.in
- B2Nsattvic.in
- Ayuvya (an app providing ayurvedic solutions to common health issues)
- BitFia (a Crypto Wallet app)

Tech Stack - Java, HTML, CSS, CMS, Shopify, WordPress, Wix, Excel, PowerPoint, Google analytics & Photoshop

### **Smart India Hackathon, May 2017**

Showcased an innovative concept to boost tourism in North East India.

The approach focused on highlighting key destinations in NE India through an engaging RPG Android game.

Tech Stack - Core Java, Git, Wireframing

### **Academic Project: LAWKEY**

This was a web platform to help lawyers and their clients interact with one another. The goal was to help users find solutions to their legal problems.

Tech Stack - Java Spring, SQL, HTML, CSS & Javascript
